TANAVISH ALI

Full Stack Developer (React • Next.js • Node.js)
Lahore, Pakistan | +92 306 7251356 | tanawishalrai5271@gmail.com
github.com/tanavishali | linkedin.com/in/tanavish-ali

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building scalable, user-friendly web applications using React.js, Next.js, NestJS, and Node.js. Skilled in modern UI frameworks, REST API integration, real-time systems, and performance optimization, with experience shipping production features from responsive frontends to multi-tenant backend architectures.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), HTML, CSS, Tailwind CSS, Material UI, Framer Motion, Redux Toolkit
Backend: Node.js, Express.js, NestJS, REST APIs
Databases: MongoDB, MySQL
Real-Time & Integrations: Socket.io / WebSockets, WhatsApp (Baileys)
Languages: JavaScript (ES6+), C++, Python
Tools: Git, GitHub, VS Code, Cursor, Claude, Antigravity
Agentic Development: Deep hands-on experience with Agentic Workflows, Claude Cowork, AI Agents, Skill-Based Architecture, Tool Integration

WORK EXPERIENCE

Associate Full Stack Developer — Consultancy Outfit, Lahore, Pakistan *Oct 2025 – Present*

DevOps Bot (AI DevOps Automation Platform) devopsbot-fe.apiswagger.co.uk/dashboard

- Built an AI-powered DevOps automation chatbot to streamline DevOps tasks and workflows using LLM-driven agents.
- Developed the frontend dashboard with Next.js and backend services with NestJS, exposing functionality via a documented REST API.
- Integrated Python and Python libraries for LLM orchestration and backend automation logic.
- Built using an agentic development workflow, leveraging AI agents and skill-based tooling to accelerate development.

Cosmonyx App (Web Platform) app-dev.cosmonyx.co/login

- Developed and maintained a scalable web application using React.js and Node.js.
- Implemented secure authentication flows and user login systems.
- Collaborated with the backend team to integrate REST APIs and manage application state.
- Ensured responsive design and cross-browser compatibility.
- Built using an agentic development workflow, leveraging AI agents and skill-based tooling to accelerate development.

Agentic Creed (AI Platform) agenticcreed.ai/home

- Contributed to development of an AI-driven platform focused on agent-based workflows and automation.
- Built responsive, dynamic UI using React.js, Next.js, and Tailwind CSS.
- Integrated REST APIs and handled frontend–backend communication for real-time interactions.
- Improved user experience through optimized UI performance and modern design patterns.

Frontend Developer Intern — Fairchance, Lahore, Pakistan (On-site) *Jan 2025 – Apr 2025*

- Developed responsive, modern user interfaces using React.js, JavaScript, and Tailwind CSS.
- Collaborated with cross-functional teams across the frontend development lifecycle.
- Integrated frontend components with backend REST APIs, ensuring smooth data flow and state management.
- Improved UI/UX by implementing responsive design and cross-browser compatibility.

Projects: fairforse.com (CRM) • fairchanceforcrm.com

Backend Developer Intern — Efaida Software House, Lahore, Pakistan (On-site) *Aug 2024 – Dec 2024*

- Developed RESTful APIs using Node.js and Express.js for internal applications.
- Managed MongoDB databases for scalable and efficient data storage.
- Worked in Agile teams to deliver backend features for client projects.
- Collaborated closely with frontend developers to integrate APIs effectively.

PROJECTS

WholesalePro – Multi-Tenant POS & Inventory Management System

Tech: *React 18, Redux Toolkit, NestJS, MongoDB, Socket.io, WhatsApp (Baileys)*

- Built a full-stack, multi-tenant POS and inventory platform for wholesale/retail businesses, supporting multiple shop tenants under a single subscription/license system.
- Implemented real-time inventory tracking and live updates using Socket.io WebSockets, eliminating manual stock refreshes across users.
- Designed role-based access control (Super Admin / Shop Owner / Salesman) to enforce secure, permission-scoped operations per tenant.
- Integrated WhatsApp messaging via Baileys for automated customer notifications, and built customer credit (Khata) management with invoice generation.
- Architected the backend with NestJS and MongoDB; developed a responsive React + Redux Toolkit frontend for state-heavy POS workflows.
- https://pov-inventory-management-system.vercel.app/#/dashboard

File It – AI Legal Case Management System

Tech: *React.js, Tailwind CSS, Node.js, MongoDB, OpenAI API*

- Developed an AI-powered legal case management system for managing clients, cases, and appointments.
- Integrated an NLP-based legal assistant using OpenAI APIs to provide legal insights based on Pakistani law.
- Built a document analyzer to extract key legal information, improving case-handling efficiency.
- Designed a responsive dashboard with secure data management and automated reminders.

EDUCATION

Bachelor of Science in Software Engineering *2021 – 2025*

University of Okara
